Endoscopic CO₂ Regulation Unit

OLYMPUS UCR

**Exploiting CO₂'s ability to minimize luminal distension,
the UCR features easy operation, a selectable flow rate, and a compact design**

Main Features

- About 150 times faster than conventional air, carbon dioxide's rapid absorption properties keep abdominal distension and related pain to a minimum during the procedure and speed up recovery afterwards.
- Easy, reliable one-button start/stop operation, pressure display, and timer function to automate CO₂ insufflation shutoff.
- Compact design allows the UCR to fit easily on an endoscopic workstation.
- Three controlled flow rate settings are available, by using the appropriate corresponding tubing. Tubes are optional.

Rapid absorption of CO₂ gas

Carbon dioxide is absorbed by human tissue about 150 times faster than conventional air.
